

## Tuxedo

Honeywell's Tuxedo Touch is a 7", high-resolution graphic touchscreen that functions as an integrated security system, home controller, camera viewer and digital picture frame in one. It is a cost-effective way to seamlessly integrate security with cameras and Z-Wave® enabled thermostats, lights, locks and shades. Homeowners can receive important alerts about events remotely with Total Connect™ Remote Services.

Whether controlling the security system or other functions within the home, the large graphic icons—which also match the Total Connect interface—simplify operation. A built-in web server lets end-users control Tuxedo Touch anywhere in their home and view live video on up to four local cameras per screen on an iPhone®, iPad®, Android™, BlackBerry®, Internet TV or any compatible wireless mobile device.\* Requires Ethernet connection to premises LAN.

A digital picture frame feature can be managed by end-users with the simple insertion of an SD card—letting them create cinema-quality slideshows right at the Tuxedo Touch display. A choice of white or silver/black blend with any décor.

Tuxedo Touch is available in English, French Canadian and Spanish language options, with voice announcement of alarm status (English only).

### Features:

- 7" color widescreen display

- 480 x 640 resolution TFT display with 16 million colors

- Intuitive, easy to use interface with large icons and menu driven navigation

- Icons match Total Connect to help up-sell remote services
